### FEATURES

- Endophyte Free
- Quick Germination
- Fast Establishment
- Early Maturing
- Season long forage
- Palatable

### USES

- Pasture
- Hay
- Grazing

### SEEDING RATES

- Drilled  
15-20 lbs. /acre
- Broadcast  
20-25 lbs. /acre

### SEEDING DATES

- SPRING  
March-May
- FALL  
August-October
- DORMANT  
December-March

### MOW HEIGHT

- Ideal in
- Max
- Min 3 in

### AVAILABILITY

- 25 lb. bag

The functionality of the mix will remain unchanged, however the mix composition and percentages of individual species may vary depending upon seed availability.

### Management

*A rotational grazing system should be used to prevent overgrazing. Let your pasture grow to a height of 6-8 inches then mow or graze to 3 inches. Use of additional nitrogen fertilization can improve yields and quality.*
